

Figure 1 is a bubble plot showing the relationship between various variables and Final grade. The x-axis lists the variables: Age, Sleep (sem), Sleep (non-sem), Exercise hrs (sem), Exercise hrs (non-sem), Resting HR, Steps/day (sem), Steps/day (non-sem), Midterm grade, and Final grade. The y-axis represents the strength of the relationship, with a scale from 0 to 10. Bubbles are colored by size and color: small light yellow for weak, medium green for moderate, and large orange for strong. The largest orange bubble is for 'Steps/day (sem)'. Other notable bubbles include 'Exercise hrs (sem)', 'Exercise hrs (non-sem)', 'Steps/day (non-sem)', and 'Midterm grade'.
